

WORK FLOW AUDIT TABLE

Task	Classification	Why?
Study for university exams	Collaborate with AI	AI explains concepts and creates practice questions, but I must understand the material myself.
USMLE Step 3 preparation	Collaborate with AI	AI summarizes medical topics and quizzes me, but clinical judgment is mine.
FlyRank internship assignments	Collaborate with AI	AI helps with code and analysis, but I validate results before submission.
Python debugging	Delegate to AI with review	AI finds coding errors quickly, but I verify every fix.
LinkedIn post writing	Delegate to AI with review	AI improves grammar and structure while I keep the content authentic.
Research for AI/Data Science	Delegate to AI with review	AI summarizes papers and resources, but I verify important information.
Workout planning	Delegate to AI with review	AI suggests routines, but I adjust them according to my fitness level.
Email and professional messages	Fully automate	AI can draft professional emails that only require a quick review.
Meeting notes and summaries	Fully automate	AI summarizes discussions much faster than manual note-taking.
Personal relationship decisions	Just me	These require personal values and emotions that AI cannot replace.
Career goal decisions	Just me	AI can advise, but the final decision about my career is mine.
GitHub README writing	Delegate to AI with review	AI creates documentation efficiently while I verify technical accuracy.
